Reporting Requirements for the American Recovery and Reinvestment Plan

For amounts received under the American Recovery and Re-Investment Plan, the Contractor shall include a monthly report for information tracking purposes of the number of direct, on-project jobs created or sustained by the Federal funds provided for projects under the appropriation and, to the extent possible, the estimated indirect jobs created or sustained in the associated supplying industries, including the number of job-years created and the total increase in employment since the date of enactment of the Act.

Monthly submittal (currently anticipated to be required the 20th of each month on all stimulus projects) by the prime contractor on each project will capture the number of employees, employees hours and total payroll for each project (monthly).

All reporting submittals from a prime contractor working on a stimulus project must be approved by the respective District Project Manager monthly. Failure to submit and obtain approval for this monthly report by the contractor will stop processing and payment of the pay estimate for the submittal month and all subsequent months.

Inclusive in these monthly submittals will be same requirements for all subcontractors employed by the prime contractor on stimulus projects. The requirement for reporting all hours has been assigned to the prime contractor.

The State Construction Bureau will arrange meetings with all prime contractors after final award and prior to the pre-construction meeting to discuss reporting requirements and answer any questions.

Electronic forms will be supplied to the contractor by the Department for reporting manpower expenditures on each project.

The Department will be responsible for reporting monthly to FHWA all requested stimulus fiscal and employment data.
